

Safe gun storage

Any child could be at risk for a gun injury. Children as young as 2 are strong enough to pull the trigger.

Keep kids away from guns

Store guns:

- **Unloaded.** Never keep a loaded gun in the house (or car).
- **Separate from ammunition** to add an extra layer of protection.
- **Out of reach and sight.** Kids young and old are curious and resourceful.
- **Locked.** Use a lockbox or gun safe, with trigger locks and/or cable locks.
